

Instructions for the **SUPER FUNNEL**

Finally... here is a fully automated system to help you recruit more people faster with less effort than ever before. It's called **The Network Marketing Super Funnel**.

While that may sound like an exaggerated name, this is actually a simple series of steps that will help you to educate and persuade your prospects. It sorts out those who are not interested and delivers only the best, most qualified prospects directly to you.

The network marketing super funnel gives you the ideal combination of a 4 step recruiting system packaged together with the smartest, most persuasive tools for following up effectively.

Over the next few minutes I will give you the exact step-by-step process we recommend you follow in order to get the very best results. Following these steps will provide you with a streamlined series of actions that deliver dependable results. Using the super funnel properly will reduce or even eliminate any of the frustration or rejection you've encountered in the past.

So let's get started.

First things first. You must become a good student and know what is contained in this amazing system. Make the commitment to put yourself in "learning mode" so you can personally benefit from all the information provided in the Super Funnel.

That means, watch the various training videos we provide you with. Also, download each of our training manuals. Then read them. You'll see that they are clearly laid out and are easy to digest.

The first part of the funnel is here: <https://homebusinessinfo.net/>

You will see a short 3 ½ minute video at the top of the page. Watch it.

Towards the bottom of the page you'll see a link to download a free ebook. We don't even ask for an email address to access it. It's only 15 pages long, but is packed with important info.

Read it. Digest it. Understand it.

This book will give you (and your prospects) the right mindset and plenty of documentation as to why you simply must have an additional means of generating income in order to financially protect yourself and your family.

At the very bottom of the page you have the ability to move to the next step.

This is where you and your prospects will learn how our business model works. You'll have access to a 21 minute video that not only gives you valuable information but also teaches you how to better explain why network marketing is such a good choice whenever you're asked.

You may want to take notes on this video, as gives you the most effective way of understanding and explaining our business model.

Then move on to part 3.

There you'll get some of the most common... and most important questions, which need to be answered in your prospect's mind, in order for them to move forward.

After watching the video about getting started, then download the ebook and read it.

You'll be impressed with how well this walks you through the process and helps eliminate any of the concerns or doubts in your prospect's mind.

A word of caution.

There's a lot of information here. Don't feel pressured to read or absorb it all in one sitting. Better to space it over a few short sessions, otherwise you may feel a bit overwhelmed.

Now let's talk about some of the best ways you can use the Super Funnel with your prospects.

Sometimes you'll have a prospect who already believes they need to get serious about creating a second source of income.

In those cases there may not be any need to send them the link to the first page of the funnel. You can send them directly to the

second page. Each of the 3 funnel parts have distinct urls that make it easy to deliver the exact information your prospect needs.

Perhaps you're talking with someone who has already been in network marketing before, but hasn't had much success, although they still believe in the concept. In cases like that you might do well to send them directly to part 3 of the funnel and show them what will be expected of them, and provide them the basic training they'll need in order to experience success right away.

As an overview concept, this funnel provides you with solid materials you can use when following up with your prospects. Rather than merely trying to convince someone with your own words, this funnel provides a professional approach.

Once you explain to your prospect that they'll have full access to the Super Funnel themselves, it will be much easier for them to picture having rapid success, because everything is presented in an organized, systematic way.

They'll believe in using this approach because it worked on them. Therefore, it's easy for them to see that it can be effective in enrolling their prospects too.

This is just like dancing. Follow the simple steps we've just laid out and soon you'll be impressing other with your own moves.

We wish you the best of success with **The Network Marketing Super Funnel.**
